The Public Buildings Service (PBS) has reengineered GSA real property activities to focus directly on delivery of services to customer agencies and to permit measurement of performance against commercial practices. PBS has reorganized along major business lines representing the services it provides. The major business lines include: Commercial Brokerage (satisfying tenant agency space requirements); Fee Developer (construction and modernization and repair and alterations of federally-owned space); Property Management (managing, operating, repairing and maintaining federal space); Portfolio Management (managing real estate assets to ensure efficient planning, return on investment and use); Federal Protective Service (law enforcement and security within GSA-controlled buildings); Property Disposal (utilization and disposal of excess Federal real property). This re-engineering is consistent with the initiative to privatize real property services.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments which approximate commercial rates for comparable space and services. Rent and other income to the fund is as follows:

The Federal Buildings Fund program consists of the following activities financed from rent charges:

Construction and acquisition of facilities.—Space is acquired through the construction or purchase of facilities and prospectus-level extensions to existing buildings. All costs directly attributable to site acquisition, construction, and the full range of design and construction services and management and inspection of construction projects are funded under this activity.

Repairs and alterations.—Repairs and alterations of public buildings as well as associated design and construction services are funded under this activity. Protection of the Government's investment, health and safety of building occupants, transfer of agencies from leased space, and cost effectiveness are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and non-prospectus extensions.

Installment acquisition payments.—Payments are made for liabilities incurred under purchase contract authority and lease purchase arrangements. The periodic payments cover principal, interest, taxes, and other requirements. Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975.

Rental of space.—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities. This program will provide an estimated 135.5 million square feet in 1996 and 121.8 million square feet in 1997.

Building operations.—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision), and general management and administration of all real property related programs including salaries and benefits paid from the Federal Buildings Fund. The following list shows the 1996 and 1997 direct program (estimated square feet and expenses in millions):

[In millions]

199	96	199	97

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the commercial rental charge. For presentation purposes the balances of the Unconditional Gifts of Real, Personal, or Other Property trust fund have been combined with the Federal Buildings Fund.

Agency debt.—The following table reflects agency debt outstanding for the construction of federal buildings under authorities previously provided:

Public Law 99–88 provided that expenses of Transportation Audit Contracts and Contract Administration activities shall be financed from overcharges collected from carriers on transportation bills paid by the Government and other similar type refunds. Public Law 99–627 granted GSA authority to delegate to the Government agencies prepayment audit of their transportation bills before they pay transportation carriers, permanent authority to pay transportation audit contractors from carrier overcharges collected, and authority to transfer net overpayments collected to the Treasury. Public Law 103–123 provided that additional expenses be financed from overpayments collected from carriers.

This fund finances, on a reimbursable basis, a national supply distribution system, a system of ordering supplies for direct delivery to agencies, a system providing for the management, on a worldwide basis, for the sale of surplus personal property for agencies, a system of transportation and travel management which ensures discounted rates for lodging, transportation, and small package mailings for Federal customers, and a system of interagency Federal Fleet Management Centers. Legislation was enacted in fiscal year 1988 to authorize full cost recovery for all supply management, operating, and overhead expenses related to providing goods and services to other agencies through the General Supply Fund. Full cost recovery pricing results in the true cost of supplies and services being reflected in charges to agencies. In 1995, the Schedules Program began a three-year phased implementation from its previous funding under the Operating Expenses, GSA appropriation to reimbursable funding. In 1997, the Information Technology Multiple Award Schedules Program is consolidated into the Supply Schedules Program in the General Supply Fund. Portions of the Transportation and Travel Management Programs, previously funded under the Operating Expenses, GSA appropriation were transferred to the General Supply Fund in 1995 and are included under Miscellaneous.

Supply operations.—

Stores, regular.—Stock of common-use commodities is purchased in volume, stocked, and issued through supply facilities to Government agencies. Sales were \$941.5 million in 1995 and are estimated to be \$890.5 million in 1996 and \$864 million in 1997. A 1995 price comparison of 120 commonly used office supplies against private sector leaders reported a 8.3% price advantage for Stores, regular supplies. In terms of service, the percentage of requisitions filled from stock within 15 days was 97%, exceeding the goal of 93%, and requisitions were shipped in an average of 9.9 days versus a goal of 12 days. These accomplishments were achieved while simultaneously lowering the inventory level by 55% since 1992.

Stores, direct delivery.—Orders for store-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$71.7 million in 1995, and are estimated to be \$65.2 million in 1996, and \$63.3 million in 1997.

Special orders.—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply facilities are purchased for direct shipment to using agencies. Sales were \$1,342.5 million in 1995, and

are estimated to be \$1,225.4 million in 1996, and \$1,253.8 million in 1997.

Schedules.—This contracting function provides a governmentwide supply support program of commercial items and information technology items required by Federal agencies and other authorized users. Reimbursable sales were \$49.1 million in 1995 and are expected to be \$16.5 million in 1996 and \$27.1 million in 1997. An on-line electronic catalog system, GSA Advantage, has been developed to allow customers to electronically browse and order items from GSA schedules. This eliminates the maintenance of paper schedules and catalogs.

Miscellaneous.—The Personal Property Sales Program sales were \$14.2 million in 1995 and are estimated to be \$13.2 million in 1996 and 1997. The Transportation and Travel Management Program sales were \$0.3 million in 1995 and are estimated to be \$4.9 million in 1996 and 1997.

Federal Fleet Management Centers.—Services are provided through a system of Fleet Management Centers. Sales were \$705.2 million in 1995, and are estimated to be \$709.6 million in 1996 and \$716.5 million in 1997. The GSA Standard Tender governing the Government's relationship with private industry as a freight shipper saved the Government over \$47 million in shipping costs in 1995. The Next Day, small package mailing program, resulted in a savings of 76% versus the comparable commercial service for 8.6 million packages mailed.

The fleet's 1995 operating cost per mile was 27.6 cents versus 27.2 cents in 1994. Studies continue to show fleet center's costs are lower than those in the private sector, averaging an approximate 5.7 cents per mile savings for sedans, minivans, and light trucks.

The Information Technology Fund was authorized by the Paperwork Reduction Reauthorization Act of 1986, as included in Public Laws 99-500 and 99-591, section 821(a)(1). The Fund was established as of January 1, 1987, and consists of the assets, liabilities and capital of the Federal Telecommunications Fund and the Automatic Data Processing Fund. The purpose of the fund is to help ensure that automatic data processing, telecommunications, and other information technologies are acquired and used by the Federal Government in a manner which improves service delivery and program management, increases productivity, improves the quality of decisionmaking, reduces waste and fraud, and wherever practicable and appropriate, reduces the information processing burden for the Federal Government and for persons who provide information to and for the Federal Government.

The fund is available for expenses and for procurement for efficiently providing information technology resources to Federal agencies for promoting use of the latest technology to deliver services, and for the efficient management, coordination, operation, and use of such resources.

Levels of funding for capital investments and for operating capital are determined through the submission and approval process of planned cost and capital requirements to OMB by GSA pursuant to section 110(a)(1), Federal Property and Administrative Services Act of 1949, as amended by Public Law 99–591.

The Information Technology Fund finances, on a reimbursable basis, the following Government-wide IT programs and services:

Federal Telecommunications Service (FTS).—The FTS provides Government-wide telecommunications services to all Federal agencies. In September 1995, management of the local and long-distance telecommunications services was integrated into the FTS. This organizational structure will enable a more efficient, cost effective and responsive delivery of services to the Federal customer.

Long-distance telecommunications services are provided to more than 1.7 million users through two ten-year multi-billion dollar FTS2000 contracts awarded to AT&T and Sprint in December 1988. The contracts provide the Government with low-cost, state-of-the-art, integrated voice, data and video telecommunications services. The contracts provide for "services" rather than equipment. GSA's role is to oversee and manage the provision of those services.

FTS manages local telecommunications services provided to Federal agencies. This includes operating consolidated systems, as well as procuring cost advantageous telephone service and equipment through competitive processes. Responsibilities include GSA support to government-wide national security emergency preparedness plans and ensuring that the critical telecommunications needs of the Government are available during local, national, and international crises.

Office of Information Security.—Provides worldwide support to all Government activities, including GSA, and allied nations through Department of Defense sponsors, conducting sensitive, classified, diplomatic or military missions. To meet this responsibility, the program participates in the development of Government-wide information security policies and provides a comprehensive range of information security technical support services necessary to manage and support mission critical communications. The program manages the Federal Security Infrastructure Program Management Office (SI-PMO), jointly chaired by ITS and DOD, which was established to form a security infrastructure in support of the NPR recommendations on the national information infrastructure for information technology.

Information Technology Applications.—Includes several IT initiatives approved by the Interagency Management Council (IMC) which ensure that state-of-the-art technologies are deployed throughout the government on a timely and cost-effective basis. The Electronic Mail (E-Mail) program provides assistance to Federal agencies in the implementation of a government-wide electronic mail service to facilitate communications among the Federal government, the private sector and U.S. citizens. The Electronic Commerce (EC) program provides government-wide support, coordination, and oversight of Federal agencies' progress in the implementation of electronic commerce capabilities which is necessary to help streamline and simplify government procurement.

ADP Technical Services.—This activity is comprised of several non-mandatory programs aimed at meeting client needs in the acquisition and effective use of ADP resources. The Federal Information Systems Support Program, with offices coast to coast, provides Federal agencies technical, contractual and administrative support in acquiring services for system definition, design and requirements analysis, software programming, facility management (including local area network management, and operation of computer systems and networks, and data capture and retrieval), and other related activities. Services are provided through regional contracts with private sector vendors tailored to local market conditions and needs of client Federal agencies. The Federal Computer Acquisition Center (FEDCAC) provides support in the com-

petitive acquisition of large dollar value non-developmental computer systems and associated services. The Federal Systems Integration and Management Center (FEDSIM) delivers a wide range of services through private sector contracts to clients worldwide including Federal Information Processing resources acquisition, systems integration, software management, information technology facilities management, local area network implementation, and networking. Also included in this category is the information processing and end-user technical and program support that GSA provides to external agency customers.

In addition to the CIO functions performed through the Operating Expenses appropriation, the Information Services and Technical Support (ISTS) program provides, on a non-mandatory reimbursable basis, GSA-wide information infrastructure for data communications and National Systems Program in support of GSA business lines.

This appropriation covers relocation costs involved in moving agencies from valuable underutilized property, targeted for public sale, to facilities determined to be more economically suitable to their needs. Relocation and disposal is considered when the benefit/cost ratio is at least 2:1. The sale of these valuable underutilized properties would provide significant revenue to the Treasury and would far outweigh the relocation costs involved. The unallocated balance as of the end of 1995 is \$1.547 million.

No appropriation is requested for this program in 1997. GSA will solicit relocation proposals from agencies and request funds to implement those proposals that have the highest economic benefit to the Government.

Auctioneers and brokers familiar with local markets may be used to accelerate the disposal of surplus real and related personal property including the outleasing of Government-owned buildings and space. Fees of auctioneers, brokers, appraisers, and environmental consultants, surveying costs, costs of advertising and costs of environmental and historical preservation services are paid out of receipts from disposals within each year in accordance with 40 U.S.C.A. 485(b).

Under its Policy activity, this appropriation provides for Government-wide policy, oversight, and asset management functions associated with real and personal property, supplies, information technology, acquisition support, transportation and travel management, Federal Procurement Data Center, Federal Equipment Data Center, Regulatory Information Service Center, and the Catalog of Federal Domestic Assistance. The Office of Planning, Policy, and Evaluation, working cooperatively with other agencies, provides the leadership needed to develop and oversee the implementation of policies designed to achieve the most cost-effective solutions for the delivery of administrative services, while reducing regulations and empowering employees.

Under the Operations activity, the account provides for Federal Supply, Federal Telecommunications, Information Technology, Federal Information Center, Property Disposal, General Management and Administration and Chief Information Officer programs. These programs include contracting for transportation and travel services and schedules; management of programs to procure automated data processing services and equipment; utilization of real and personal property by Federal agencies and the transfer among agencies of excess real and personal property; disposal of surplus real property by sale, exchange, lease permit assignment, or transfer, as well as the protection and maintenance of excess and surplus property pending its disposition; appraisal of excess and surplus property, necessary environmental and cultural analyses, reuse planning, and real property utilization surveys; Indian Trust Accounting, and administrative support of Congressional District and Senate State offices.

This appropriation provides agencywide audit and investigative functions to identify and correct management and administrative deficiencies within GSA which create conditions for existing or potential instances of fraud, waste and

mismanagement. The audit function provides internal audit and contract audit services. Contract audits provide professional advice to GSA contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of GSA operations and programs, test internal control systems, and develop information to improve operating efficiencies and enhance customer services. The investigative function provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

This appropriation provides support consisting of pensions, office staffs, and related expenses for former Presidents Gerald R. Ford, Jimmy Carter, Ronald Reagan and George Bush and for pension and postal franking privileges for the widow of former President Lyndon B. Johnson. Also, this appropriation is authorized to provide funding for security and travel related expenses for each former President and the spouse of a former President pursuant to Section 531 of Public Law 103–329. As of October 1, 1998, pursuant to Public Law 103–123, support will be limited to pensions only for these individuals, including anyone who may become a surviving spouse of these former Presidents. Support for future former Presidents or their surviving spouse will also be limited to pensions only beginning five years after leaving office.

Funds are appropriated in accordance with the Presidential Transition Act of 1963, as amended, to provide for an orderly transfer of executive leadership. New appropriations are generally requested in Presidential election years.

In the case where the President-elect is the incumbent President or in the case where the Vice President-elect is the incumbent Vice President, there shall be no expenditure of funds for the provision of services and facilities to such incumbent under this Act, and any funds appropriated for such purposes shall be returned to the general funds of the Treasury.

Public enterprise funds:

CONSUMER INFORMATION CENTER FUND

For necessary expenses of the Consumer Information Center, including services authorized by 5 U.S.C. 3109, \$2,060,000, to be deposited

into the Consumer Information Center Fund: Provided, That the appropriations, revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the aggregate amount of \$7,500,000. Administrative expenses of the Consumer Information Center in fiscal year 1997 shall not exceed \$2,601,000. Appropriations, revenues, and collections accruing to this fund during fiscal year 1997 in excess of \$7,500,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriations Acts.

Note.—A regular 1996 appropriation for this account had not been enacted at the time this budget was prepared. The 1996 amounts included in this budget are based on the levels provided in three continuing resolutions: P.L. 104–91, P.L. 104–92, and P.L. 104–99.

The Consumer Information Center Fund provides for the efficient operation of the Consumer Information Center's activities. Under the revolving fund, the Consumer Information Center's activities are financed from moneys deposited to the fund, consisting of annual appropriations from the general funds of the Treasury, reimbursements from agencies, fees collected from the public and other income incident to Consumer Information Center activities.

Administrative expenses.—The Consumer Information Center helps Federal departments and agencies release consumer information collected as a by-product of the Government's

Public enterprise funds—Continued

CONSUMER INFORMATION CENTER FUND—Continued

program activities. The Consumer Information Center maintains close working relationships with more than 40 Federal agencies in order to identify, develop, promote, and make accessible to the public Federal consumer information. In addition, the Consumer Information Center promotes public awareness of this information through publication of the quarterly *Consumer Information Catalog*, through special projects promoting the catalog, and through various media services. Administrative expenses are funded by the direct appropriation and by fees collected from the public when ordering publications listed in the catalog.

Publications distribution.—The Consumer Information Center bills agencies and in turn reimburses the Government Printing Office for the costs of distributing free publications to the public.

This fund provides for general management and administration centralized internal and external reimbursable administrative support functions, duplicating, and distribution operations.

General management and administration.—The general management and administration centralized administrative support services are funded through reimbursable funding from GSA's benefiting accounts and from external sources including small agencies and commissions for services provided. Reimbursable services include administrative, financial, and management support, legal advice and services and equal employment opportunity; budgetary policy and liaison activities with Congress and OMB; and management review and oversight of financial management systems. This funding provides liaison with the Small Business Administration on national minority business proposals and contracts to ensure that minority and small business receive a fair share of the agency's business. Responsible for implementation and execution of the functions and duties under sections 8 and 15 of the Small Business Act (P.L. 95-507).

Centralized duplicating and distribution operation.—Fast turn-around duplicating and distribution services are provided for the General Services Administration and other Federal agencies. These duplicating and distribution operations are

15

under continuous review to ensure that they are the least costly alternative to the Government.

GENERAL PROVISIONS SEC[TION]. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with the cost

GENERAL SERVICES ADMINISTRATION—

the General Services Administration shall be credited with the cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129).

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

SEC. 3. Funds in the Federal Buildings Fund made available for fiscal year [1996] 1997 for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary to meet program requirements. [Any] Notice of any proposed transfers shall be [approved in advance by] transmitted promptly to the Committees on Appropriations of the House and Senate.

SEC. 4. Section 10 of the General Services Administration General Provisions, Public Law 100-440, dated September 22, 1988, is hereby repealed.

[Sec. 4. No funds made available by this Act shall be used to transmit a fiscal year 1997 request for United States Courthouse construction that does not meet the standards for construction as established by the General Services Administration, the Judicial Conference of the United States, and the Office of Management and Budget and does not reflect the priorities of the Judicial Conference of the United States as set out in its approved five-year construction plan.]

[Sec. 5. The Administrator of General Services is authorized to accept and retain income received by the General Services Administration on or after October 1, 1993, from Federal agencies and non-Federal sources, to defray costs directly associated with the functions of flexiplace work telecommuting centers.]

[SEC. 6. Of the \$11,000,000 made available by this Act and Public Laws 102–393 and 103–123 for flexiplace work telecommuting centers, not less than \$2,200,000 shall be available for immediate transfer to the Charles County Community College, to provide facilities, equipment, and other services to the General Services Administration for the purposes of establishing telecommuting work centers in Southern Maryland (Charles, Calvert, and St. Mary's County) for use by Government agencies designated by the Administrator of General Services: *Provided*, That the language providing authority to pay a public entity in the State of Maryland, not to exceed \$1,300,000 for the purpose of establishing telecommuting work centers in Southern Maryland, under the heading "Federal Buildings Fund Limitations on Availability of Revenue" in Public Law 103–329 (108 Stat. 2400), is hereby repealed.]

[Sec. 7. Notwithstanding any provision of this or any other Act, during the fiscal year ending September 30, 1996, and thereafter, no funds may be obligated or expended in any way for the purpose of the sale, excessing, surplusing, or disposal of lands in the vicinity of Norfolk Lake, Arkansas, administered by the Corps of Engineers, Department of the Army, without the specific approval of the Congress.]

[Sec. 8. Notwithstanding any provision of this or any other Act, during the fiscal year ending September 30, 1996, and thereafter, no funds may be obligated or expended in any way for the purpose of the sale, excessing, surplusing, or disposal of lands in the vicinity of Bull Shoals Lake, Arkansas, administered by the Corps of Engineers, Department of the Army, without the specific approval of the Congress.]

[Sec. 9. Section 17(c) of Public Law 101–136 is amended by—
(a) Striking "within 3 years of date of conveyance," and inserting in lieu thereof, "simultaneously"; and by striking the remainder of the first sentence following, "the islands of Hawaii, Oahu, and Molokai" and inserting a period immediately thereafter; and

(b) in paragraph (2) by striking "in the exchange described in subsection (c)(1)" and inserting, "or recreational" immediately after the word, "educational".] (Independent Agencies Appropriations Act, 1996.)
